

## Aviation Brigades

Doctrine provides a military organization with unity of effort and a common philosophy, language, and purpose. This document is the Armys keystone doctrine for fighting and sustaining aviation brigades. This field manual (FM) is intended for all aviation commanders, staffs, and any United States (U.S.) military personnel expecting to conduct operations with Army aviation units. The operational concepts described in this manual reinforce fundamental principles found in Army doctrine. It provides overarching doctrinal guidance for employing aviation brigades in full spectrum operations and a foundation for developing tactics, techniques, and procedures (TTP) in other/follow-on Army manuals.
