

Statistics (Complete Advanced Level Mathematics)

Statistics and probability are clearly defined and mathematical modelling is highlighted as a process in which statistics can be developed and applied. Work, in many cases, is focused on realistic statistical problems, with emphasis on the importance of defining the problem; collecting data; analysing data and interpreting through appropriate modelling. Includes a number of key statistical tables, for example: Binomial, Poisson and Normal Cumulative Distribution Functions. Additional tables are available in the Statistics Resource File. Also supported by Advanced Level Mathematics Tutorials: Statistics CD-ROMs.
