

Aerospace Reactionless Propulsion and Earth Gravity Generator

Newtons Laws of Physics have to be Modified when we are dealing with Non-inertial Frames of Reference. The Modified Laws of Physics are not necessarily the same as those established for the (Non-Rotating) Inertial Frame of Reference. In the Modified Laws of Physics it is possible to have an Action without an Equal and Opposite Reaction by exploiting the Hawk Anomaly. The presented mathematical models demonstrate the possibility of achieving continuous Earth Gravity Propulsion in Space with reasonable energy expenditures as well as Generating Energy directly from Earth Gravity.
