

## My Sign Is Libra

Perfect for pre- and young teenagers, these pocket-sized books explain the principles of the art of astrology. Each sign of the Zodiac appears in an individual book that describes the attributes and characteristics of the people born under that sign, and each book explains in clear, simple language how the position of the stars in the sky on the day of a persons birth influences his or her character, talents, and relationships. Included are forms to fill out that involve the readers and his or her friends and relatives signs, dates and times of birth, character traits, interests, and relationships to one another. Also discussed are reasons why people of different signs have different character traits and why people of the same sign can be quite different from one another.
