

# Beginning Dynamic Websites with ASP.NET Web Matrix

With this book and Web Matrix, you'll be developing your own powerful ASP.NET websites in no time. We'll start at the beginning, learning how to create graphical web pages in Web Matrix. Then we'll use Visual Basic .NET and databases to add the dynamic features usually seen in expensive commercial websites. We'll finish by looking at some of the expert ASP.NET features - writing our own controls and web services. Even if you've never programmed before, this book will take you right into the world of professional web development. You'll be amazed at how easy it is, and how much you can do.
