

Hands-On Cisco: Basic TCP/IP LAN Configurations (Workbook)

This workbook contains 21 labs and FREE lab time on our Internet-based Cisco network. Learn to configure two Cisco 2500-series routers through hands-on experience. Configure the routing protocol, assign an IP address (using subnet masking) and test the router connections with ping, traceroute, CDP and telnet. Learn to save your configurations and paste them into a router later. Simply schedule your network session time, return at that time and click the Lab # button defined in the book. Take the guesswork out of getting certified!
