

Astm Standards Related to Testing of Radiation-Cured Coatings 2002

This desktop resource, available in print or CD-ROM, provides quick and easy access to the most commonly used ASTM test methods, procedures, and guides on radiation curing of coatings and allied products. These ASTM standards are often used and referenced in the radiation curing industry. Some are used in coating chemistries and others are specially designed for radiation-cured products. This handy reference guide is a valuable asset for scientists, technologists, laboratory technicians, and managers engaged in radiation curing of coatings, adhesives, inks, and sealants. It is also a beneficial resource for professionals in the powder coatings and irradiated foods fields.
