Shares intriguing ideas from Nathan Yau, author of *Visualize This* and creator of flowingdata.com, with over 66,000 subscribers. Focuses on visualization, data graphics that help viewers see trends and patterns they might not otherwise see in a table. Includes examples from the authors own illustrations, as well as from professionals in statistics, art, design, business, computer science, cartography, and more. Examines standard rules across all visualization applications, then explores when and where you can break those rules.
