

Designers Guide to EN 1997-1 Eurocode 7: Geotechnical Design General Rules

Designers Guide to EN 1997-1 presents a detailed guide to the new Geotechnical Design Eurocode. As such it gives an invaluable insight into a code that, for the first time, provides a comprehensive design philosophy that is not only applicable to all forms of geotechnical problems but also shares a common philosophy with the design methodology for structures of all the commonly encountered construction materials.
