

## Linux kernel source code analysis: TCPIP implementation(Chinese Edition)

Paperback. Pub Date: 2011 Pages: 1062  
Language: Chinese Publisher: Machinery Industry Press  
Linux kernel source code analysis: TCPIP implementation (Set 2 Volumes) discusses in detail the TCP / IP implementation in the Linux kernel version 2.6.20 . The book gives a lot of source code. source code. detailed notes. to help the reader master the TCP / IP implementations. Linux kernel source analysis: TCPIP achieve (Set 2 volumes) gradually discussed level according to the protocol stack. from the driver layer to the transport layer. including the input and output of the driver implementation. the interface layer. the IP layer of the input and output and the processing of IP options the neighbor subsystem routing socket and transport layer. the book basically covers all the knowledge points of the network architecture. TCP. including TCP connection establishment and termination....
