

Fossils: Identification Guide (Identification Guides)

This book is part of a great new series of compact and attractive identification guides designed to help you distinguish between varieties of natural phenomena. Over 100 of the most common plant and animal fossils of Europe are featured with bitesize information including identification features, stratigraphy and distribution and similar or related fossils. Divided into types, such as molluscs and echinoderms, the clear, easy-to-follow design, precise colour illustrations and additional colour photography will quickly help you spot your hoplites from your Euhoplites.
