

The Constitutional Logic of Affirmative Action

Few issues are as mired in rhetoric and controversy as affirmative action. This is certainly no less true now as when Ronald J. Fiscus *The Constitutional Logic of Affirmative Action* was first published in 1992. The controversy has, perhaps, become more charged over the past few years. With this compelling and rigorously reasoned argument for a constitutional rationale of affirmative action, Fiscus clarifies the moral and legal ramifications of this complex subject and presents an important view in the context of the ongoing debate. Beginning with a distinction drawn between principles of compensatory and distributive justice, Fiscus argues that the former, although often the basis for judgments made in individual discrimination cases, cannot sufficiently justify broad programs of affirmative action. Only a theory of distributive justice, one that assumes minorities have a right to what they would have gained proportionally in a nonracist society, can persuasively provide that justification. On this basis, the author argues in favor of proportional racial quotas and challenges the charge of reverse discrimination raised in protest in the name of the innocent victims of affirmative action as an action necessary to approach the goals of fairness and equality. *The Constitutional Logic of Affirmative Action* focuses on Supreme Court affirmative action rulings from *Bakke* (1976) to *Croson* (1989) and includes an epilogue by editor Stephen L. Wasby that considers developments through 1995. General readers concerned with racial justice, affirmative action, and public policy, as well as legal specialists and constitutional scholars will find Fiscus' argument passionate, balanced, and persuasive.
