

Janes Avionics 2006-2007

Janes Avionics contains detailed information on airborne electronic equipment for both military and civil aircraft, ensuring you stay up-to-date with the latest technological developments and new production lines. In-depth descriptions of fundamental technologies, including datalink, radar, electro-optic systems and helmet-mounted displays provide an invaluable aid to making critical procurement, training and commercial decisions. Each entry is arranged by country of manufacture and contains information on function, development history, technical description, specifications, operational status and contractor. Colour images facilitate quick assimilation and comparison of important design and layout characteristics. Comprehensive equipment and manufacturer indices enable rapid data search and browsing of related entries.
