

# Adobe InDesign CS3: Video Training Book

Benefit from the best of both mediums--video-based training and a printed guide! Each lynda.com Video Training Book offers hours of instructor-led video instruction, complete with a step-by-step, printed book to guide readers through each tutorial. The video tutorials let readers learn at their own pace, while the book offers a complete reference, helping readers identify the video tutorials they want to watch (timecodes are printed in the book), giving them the exercise files they need, and highlighting important keyboard shortcuts, tips, notes, and practical advice along the way. In Adobe InDesign CS3: Video Training Book, David Blatner walks readers through all the essentials of this powerful layout program, sharing his techniques for creating compelling content. The lessons cover all the basic principles of InDesign CS3, from getting to know the workspace and tools to using new features such as object effects (including feathered gradients), finer transparency controls, table styles, new export options, and enhancements for better productivity. The projects walk you through the real-world process of creating documents, working with text and objects, applying formatting and styles, placing images, managing color, and outputting files. Exercise files that accompany the training videos allow readers to follow along and learn at their own speed. This new series offers creative professionals the tools they need to get up to speed quickly and affordably--a Video Training Book is a great alternative to a weekend crash course! The Video Training Book series features the proven teaching methods of lynda.com and of authors and industry experts, such as Deke McClelland, Chris Orwig, Garrick Chow, and David Blatner, who make learning an engaging experience, bringing clarity to new or difficult concepts and software programs.
