

Introduction to Forensic Science

This course manual is geared toward introductory college or high school forensic science classes. It covers the core concepts of forensic science, focusing on a variety of evidence, including fingerprints, blood, shoe evidence, tool marks, tire tracks, questioned documents, hair, and trace evidence. Each chapter includes a list of additional resources and a series of questions to encourage critical thinking about the topics covered.

Forensic scientists also help solve crimes by reconstructing faces from skulls, and sometimes animating or virtually ageing them, or studying corpses to pinpoint the cause and time of death. Criminals almost always leave evidence at crime scenes, or unwittingly collected it.
