

# Linux Networking: Hands-On

This is a guide to building a TCP/IP network using Linux. It includes step-by-step instructions for setting up a DNS, e-mail server, directory service, network printing and file sharing and networking authentication using Kerberos. Each chapter includes a guide to terminology, review exercises and critical thinking questions, in addition to screen shots and diagrams. The content is suitable for someone who is comfortable with Linux but wishes to extend their knowledge with practical experience.
