

# ISO 1067:1974, Analysis of soaps -- Determination of unsaponifiable, unsaponified and unsaponified saponifiable matter

The determination is carried out in the following way: Extraction of matter soluble in hexane, and titration of the free fatty acids removed, with potassium hydroxide solution. Saponification of products soluble in hexane neutralized in this way and extraction of the unsaponifiable matter by hexane. This title may contain less than 24 pages of technical content.
