

ISO 2796:1986, Cellular plastics, rigid - Test for dimensional stability

Determination of the changes of linear dimensions which occur when the test specimens (100 mm x 100 mm x 25 mm) have been subjected to specified environments for a definite period of time and reconditioned. The method suggests a range of conditions of temperature and humidity, from which one or more of the desired test conditions can be selected. This title may contain less than 24 pages of technical content.
