

# Commvault Simpana v10 - Storage Module One (Commvault Simpana 10 Modules)

Welcome to my series on the newly released Commvault Simpana 10 backup product. This series of informal modules are written around different sections with this module focusing around new features of v10 deduplication, libraries, media agents and storage. This is an informal document and even though Commvault provides online documentation it is weak in the whys and wherefores that these modules go into more detail on. The modules do require a modicum of understanding around the Simpana product and are geared for basic to mid range knowledge.
