

Lan Basics With Hands-On Netware 3.11/3.12

This is an introductory-level LAN text, written in non-technical terms for students in information systems and management departments. It is written with a hands-on tutorial approach and can be used in lab sessions or training seminars. The hands-on portions are written with a low-security, high-proficiency end-user in mind, rather than a network supervisor, ensuring that the necessary safety skills are consolidated.
