

Light Airplane Design sold by Author

Used as a text in several universities and aircraft companies, a very popular book among amateur and professional designers. A step-by-step description of the PL-1 and PL-2 preliminary designs; the reasoning behind each feature, with no high math. Easy to read, 80 pages, 61 figures, 18 tables, even some cartoons by the author. This book is full of American spirit... [I]t explains intelligently all the problems in great detail, e.g., designing a good looking airplane, or solving the problem of manufacturing parts. (January 1971) - Professor Shisho Naito, Chief Design Engineer of the FA-200 light airplane, Fuji Heavy Industries.
