

# Management Science/Operations Research: A Strategic Perspective

This book has been designed to fill a market need for a shorter book which can be covered in 6 weeks to one college quarter. The cases will emphasize more than just individual quantitative methods for specific situations; they will help students with problem diagnostics and modeling processes. Some topics from MIS will be integrated as well. It will be a durable and striking book since it is to be case bound with a four-color cover. The book consists of 30% text and 70% cases. The text will also include a data disk.
