

Newnes TV and Video Engineers Pocket Book, Third Edition (Newnes Pocket Books)

This well-known book is an essential tool for every service engineer, and an extremely useful reference source for a wide range of engineers, students, sales and installation staff. It presents a wide range of data and key information in a compact form, covering television reception, satellite and cable television, video recorders, colour camera technology, teletext, sound systems, fault-finding procedures and much more. The new edition has been thoroughly updated to include digital and other new technologies, with new chapters on digital camcorders and VCRs, digital television, Dolby sound systems, and home cinema. Eugene Trundle is well known as a contributor to Television and other magazines, and as author of a number of books on servicing and TV technology. He also works in the servicing industry, so his writing is based on hands-on experience.

Well known and essential tool for every service engineer. Contains wide range of data and essential information in a compact form. Thoroughly updated to cover the latest technology such as digital TV and video technology.
