

Highway Survey and Design - road and bridge engineering technology(Chinese Edition)

Language: Chinese. Pub Date : 2010-3-1
Pages: 84 Publisher: Peoples Transportation book combines highway engineering standards and related specifications . according to the infrastructure projects in highway engineering design documentation approach and other content requirements to task as the central organization course content. and allow students to complete specific projects in the process learn to complete the corresponding tasks. and build relevant theoretical knowledge . the development of vocational skills. Content highlight the students vocational skills training . focus on the selection of theoretical knowledge to complete the task . while fully taking into account the need for theoretical knowledge . The book consists of five learning tasks. namely Highway Survey and Design Cognition . Tianfu - New two roads through flat graphic design . Tianfu - New two roads thro...
