

## Coping: A Young Womans Guide to Breast Cancer Prevention

Accelerated Reader is a program based on the fact that students become more motivated to read if they are tested on the content of the books they have read and are rewarded for correct answers. Students read each book, individually take the test on the computer, and receive gratification when they score well. Schools using the Accelerated Reader program have seen a significant increase in reading among their students. This collection of titles was created to increase awareness among the teenage population. The test disk will help your students remember the important information imparted here.
