

RDS: The Radio Data System (Artech House Telecommunications)

Providing access to information on RDS technology, specifications and implementation, this text uses a step-by-step approach to overview the background, techniques, capabilities and limits of these systems. It references and explains enhancements to RDS and RDS-TMC technology and includes a description of RDS-TMC and its implementation as pursued by the European Commission; a discussion solution-enhancing alternative radio data systems; and information about RDS implementation held by the European Broadcasting Union (EBU) and the RDS reform.
