

Real World Adobe GoLive 4

Adobe GoLive 4.0 is a full-featured, visual Web page editor that combines powerful site management with support for a host of advanced features, from JavaScript to Flash. Such an industrial-strength program calls for an industrial-strength guide like Real World Adobe GoLive 4.0, which is packed with under-the-hood production tips and techniques from two experts in Web design. This in-depth guide to creating Web sites (in Windows and Mac OS) begins with a thorough description of the GoLive interface--its dialogs, palettes, and tools. You'll learn how to create, edit, and manage your site, and get the most out of the more complex features, such as DHTML and scripting. You'll also find complete coverage of all that's new in GoLive 4.0, including tighter integration of XML and Microsoft Active Server Pages, advanced table-editing features, and the ability to edit QuickTime movies within GoLive. Platform: MAC WIN
