

# CodeMaster - Seismic Design Category (2006 IBC / ASCE 7-05)

This two-page laminated, handy reference tool contains everything you need to know about the determination of seismic design categories. It is a great time-saving tool and provides a step-by-step procedure to determine a structures seismic design category in accordance with the 2006 IBC and ASCE 7-05. Shortcuts and illustrations are provided to help quickly assess applicability of exceptions and find the needed information.
