

IEC 60332-2-1 Ed. 1.0 b:2004, Tests on electric and optical fibre cables under fire conditions - Part 2-1: Test for vertical flame propagation for a single small insulated wire or cable - Apparatus

Specifies the test apparatus for testing the resistance to vertical flame propagation for a single small vertical electrical insulated conductor or cable, or optical fibre cable, under fire conditions. The procedure, together with an informative annex of recommended requirements for performance, is given in IEC 60332-2-2. Has the status of a group safety publication in accordance with IEC Guide 104.
