

How to Fail at Life: Lessons for the Next Generation

The perfect graduation gift: The things they don't teach in school ... but you'll wish they did! The late, great, personal development guru Jim Rohn lamented, "It's too bad failures don't give seminars. Wouldn't that be valuable? If you meet a guy who has messed up his life for forty years, you've just got to say, John, if I bring my journal and promise to take good notes, would you spend a day with me? Well, Jim, your wish has come true. As a time-honored expert in the art of failure, author Mark Aspelin has demonstrated exceptional skill by messing up in nearly all of the important areas of life: relationships, money, health, education, career ... and the list goes on. How to Fail at Life: Lessons for the Next Generation is the ultimate what not to do guide, filled with stories of self-inflicted catastrophes and completely avoidable suffering, along with some inspiring tales of redemption that reveal the secrets for how to live a happy and fulfilling life. Mark wrote this book for his son, as a fun way to pass on timeless success principles, just in case Mark gets hit by the proverbial beer truck. Learn how to FAIL SMART! You won't find any fancy buzzwords or secret formulas that are guaranteed to give you fame, fortune, enlightenment, and six-pack abs in 30 days without leaving your couch. Mark has read a bazillion books in the personal development space and quickly found that the principles of success are simple and consistent and have been documented ad nauseam. Why are the same success principles used again and again? Simple. They work. There really is a right way and a wrong way to fail in life. For the few key areas that you want to develop and master, failure is something to be actively pursued and celebrated. It may sound strange, but when you fail fast and fail big in those few vital areas, you'll be on the fast track to accomplishing your definition of success. For the other areas of your life, the right way to fail is to let others do it for

you and learn from their mistakes. Staggering amounts of time and suffering can be avoided by learning from the mistakes of others. When it comes to failure in most areas of life, its better to watch the movie than be a character in it. Rest assured, youll still have plenty of opportunities to fail in life, but you might as well narrow down the list so youll fail smart. This ones for you, Jim Rohn. Mark is happy to spend a day with you to show how failure is really done. Get ready to take some notes.
