

# VBScript & ActiveX Wizardry: Master the Art of Creating Interactive Web Pages with Visual Basic Script and ActiveX

Teaches how to add data entry forms to Web pages and have the users PC verify the data before sending it. Teaches programmers everything they need to know about Microsofts exciting new ActiveX technology, with demonstrations of how to use all the most important controls with VBScript. Describes how users can play video, sound and music on their Web pages, and even make their page say hello. Explains how to display message and dialog boxes on your Web pages in response to viewer input.
