The Design and Application of Controlled Low-Strength Materials (Flowable Fill)

ASTM International - Symposia Papers & STPs - Browse by Year It is a mixture of cementitious material, soil, water, and sometimes fly ash and admixtures. Here 26 papers, from The Design and Application of Controlled Low-strength Materials (flowable Fill) . Volume 1331 of ASTM STP Volume 1331 of American Society for Testing and Materials: ASTM special technical publication **The Design and Application of Controlled Low-strength Materials** The design and application of controlled low-strength materials (flowable fill) / Amster K. Howard and Jennifer L. Hitch, editors, (STP 1331) Includes bibliographical references and index. Series: ASTM special technical publication 1331. **Environment - ASTM International STP1578** Graphite Testing for Nuclear Applications: The Significance of Test . STP1459 Innovations in Controlled Low-Strength Material (Flowable Fill) STP1436 Composite Materials: Testing and Design, Fourteenth Volume . STP1251 Special Applications and Advanced Techniques for Crack Size Determination. **The Design and Application of Controlled Low-strength Materials** The design and application of controlled low-strength materials (flowable fill) / Amster K. Howard and Jennifer L. Hitch, editors. (STP 1331) Includes bibliographical references and index. Series: ASTM special technical publication 1331. **Jennifer L Hitch - AbeBooks** Flowable Fill Promotes Trench Safety and Supports Drainage Pipe Buried 60. 255. Bedding .
