

# Hello World: PHP Coding for Beginners

Learn PHP with ease through practical examples. You are going to learn the basics of PHP, by the end of the book you will be able to build registration forms, work with sessions, store data through MySQL and code simple applications in general. Ideal for those who are starting or for those who have tried everything but coding still an enigma. The book has got an approach that does not overload the reader with information that he won't need, instead it injects them as the reader evolves so that he absorbs the information smoothly and naturally. Previous HTML knowledge is not a requirement although recommended.
