

# UNIX(r) System V Release 4 Users Reference Manual/System Administrators Reference Manual(Commands A-L) for Intel Processors

This newly reorganized manual describes the interfaces and execution behavior of all UNIX System commands from a to l including new multiprocessing commands. These include general-purpose user commands, basic networking commands, form and menu language interpreter, system maintenance commands, and enhanced networking commands. Intended for UNIX administrators and end-users. This volume contains supplemental cross-reference to aid those familiar with the old organization. This manual along with the new volume covering Commands M - Z replaces the SVR4/386 USERS REFERENCE MANUAL (0-13-931150-1) and SVR4/386 SYSTEM ADMINISTRATORS REFERENCE MANUAL (0-13-957523-5). Please see front section of PTR Preview for further information on UNIX Press titles.
